

#### NALCO global solutions.

Nalco has been delivering innovative solutions to our clients' toughest utility, process and environmental challenges since 1928.

Our goal is to help ensure optimum and trouble-free operations in your enterprise, enabling you to focus on your core business.

Nalco has more advanced technologies in the field and in the R&D pipeline than ever before - technologies designed to lower operational cost, improve energy and process efficiencies, enhance productivity and protect our environment.

Our on-site experts and global innovators are key in delivering the correct technology for your unique needs and opportunities.

More and more, the world's industries are looking to Nalco for solutions to their utility, process, and environmental needs.

People you trust, delivering results  
Serving over 60,000 industrial clients in 130 countries.
